

## **VEHICLE SAFETY DEFECT SERVICE BULLETIN**

TO: All NOS Distribution Channel Customers (VIA CERTIFIED MAIL)  
RE: **Incorrect Burst Discs Installed in NOS Bottle Valves by Supplier (Cramer Decker Industries)**

### **INCORRECT BURST DISCS INSTALLED IN VALVES FOR SMALL BOTTLES UTILIZED IN NITROUS OXIDE SYSTEMS (NOS) KITS FOR MOTORCYCLES, ATV's, PERSONAL WATERCRAFT AND SNEAKY PETE KITS AND ACCESSORIES**

Holley Performance Products has been informed by Cramer Decker Industries that a defect which relates to motor vehicle safety exists in certain burst discs that they inadvertently incorporated into nitrous oxide systems used on motorcycles, ATV's, personal watercraft, Sneaky Pete systems, and other automotive kits that use small bottles (10oz to 2.5 lb). All of the below listed kits and related accessories are sold and distributed under the Nitrous Oxide Systems (NOS) brand name.

The incorrect burst discs were installed in bottle valves commonly used on small nitrous bottles (10 oz to 2.5 lb). While the incorrect disc does not pose an immediate danger if the bottle is used in a manner consistent with safe nitrous refilling procedures and use, the combination of overfilling a bottle and exposing the bottle to high temperatures may cause the bottle pressure to exceed the safe working limits of the bottle resulting in bottle failure (bursting).

Attached is a full listing of all affected part numbers manufactured by NOS. All bottle valves, whether sold in kit form, assembled to bottles, or purchased individually, along with replacement burst discs purchased separately that were purchased from NOS from February 1, 2006 thru November 1, 2006 are subject to this recall.

#### **Action Required**

NOS Distribution Channel Customers should immediately determine if inventory is on hand that was purchased within the affected period (February 1, 2006 thru November 1, 2006). A date code is present on NOS packaging that may be helpful in determining the date the product was purchased. Any product containing bottle valves for small bottles purchased within the affected date range should be returned for replacement of the burst discs. Please contact the Customer Service Department @ 1-800-638-0032 for a Returned Goods Authorization (RGA) number and return instructions.

#### **Compliance with the National Traffic and Motor Safety Act**

The National Traffic and Motor Vehicle Safety Act, as amended, provides that each piece of equipment which is subject to a recall campaign must be adequately repaired within a reasonable time after the owner has tendered it for repair. Failure to repair within sixty (60) days after tender of the equipment is prima facie evidence of failure to repair within a reasonable time.

If the condition is not adequately repaired within a reasonable time, the owner may be entitled to

an identical or reasonable equivalent piece of equipment at no charge or to a refund of the purchase price less a reasonable allowance for depreciation.

Sincerely,

Nitrous Oxide Systems

## **AFFECTED PART NUMBERS AND CONTACTS**

Holley has determined that the following NOS part numbers include the incorrect burst disc which Cramer Decker Industries incorporated into nitrous oxide systems. NOS is immediately recalling these products. Please immediately return these products to NOS. Upon receipt of these products, NOS will replace the returned product.

For more information with respect to this recall, please contact the Customer Service Department @ 1-800-638-0032
